

Amendments to the Specification

Page 3, the first full paragraph, lines 11 to 14, replace the paragraph with:

Particularly, in the invention, the digital content to be transferred from the processing apparatus to the output unit is encrypted, with a ~~formatting~~formatted unit of the digital content in plaintext taken as one unit, in a part of the units as a subject of encryption.

Pages 24-25, the paragraph bridging these pages, page 24, line 26 to page 25, line 3, replace the paragraph with:

Note that the ~~encryption~~decryption processing section 402 may be implemented as hardware in the display control unit 303 or mounted as software by providing its own CPU and memory within the display control unit 303.
